

Online safety tips for children and parents EYFS/ KS1

Pre-school
children are
online for an
average of 71
minutes a day*

Put yourself in control

Make use of the parental controls available on your home broadband and any internet-enabled devices. You can find out how at your broadband provider's website or by visiting internetmatters.org.

Help them learn through games

Games are a great way for young children to explore the internet and learn about the world around them. You can choose safe, fun and educational games free of charge from providers such as Fisher Price or about their favourite characters like Peppa Pig.

Search safely

Use safe search engines such as swiggle.org.uk or kids-search.com. Safe search settings can also be activated on Google and other search engines as well as YouTube. You can find out more at google.co.uk/safetycentre.

Set boundaries

It's never too early to start setting rules about when and for how long your child can use devices and start to introduce the subject of internet safety at the same time. Encourage children to use devices in a communal area, keep other devices out of reach and use passwords so they can't go online without asking you first.

Explore together

Set your homepage to a child-friendly site such as CBeebies and give them a user account which only allows access to sites and apps you've chosen.

Children can now have a digital footprint before they learn to speak and often before they're even born.

Internet Matters is a free online resource for every parent in the UK. We'll show you the best ways to protect your children online as they grow up - with information, advice and support on all the big e-safety issues.
